

**PIM International is the only international publication dedicated to powder injection moulding (PIM). Coverage includes metal (MIM), and ceramic (CIM) injection moulding as well as hardmetals (cemented carbides), microPIM and 2-material PIM.**

**Our extensive international readership comprises industrial producers, researchers, academics, industry suppliers and end-users.**

**Papers published in PIM International not only benefit from inclusion in the industry's most widely read publication, but are also promoted extensively via our e-newsletter, as well as being made available for download via [www.pim-international.com](http://www.pim-international.com) after publication.**

#### **SUBMISSION TERMS**

There is no charge for publishing papers in *PIM International*. Submissions to *PIM International* are considered for publication on the basis that:

1. The paper presented relates to the core technology areas as defined above;
2. All authors are aware of, and have consented to, the submission to *PIM International*;
3. Due regard has been paid to ethical considerations relating to the work reported;
4. The paper contains no libellous or unlawful statements.

Authors are responsible for obtaining permission to reproduce any material or illustrations for which they do not hold the copyright.

#### **SUBMISSION PROCEDURE**

Authors should submit work by email to Nick Williams, Managing Editor. Email: [nick@inovar-communications.com](mailto:nick@inovar-communications.com), tel: +44 (0)1743 454991.

Upon acceptance of a paper, we will inform the author by email with an estimated publication date. Prior to publication, we will provide a PDF proof of the final artwork. At this stage authors are able to make final minor modifications to the paper.

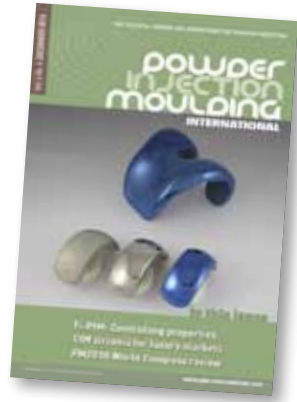

#### **AUTHOR COPIES**

Upon publication, authors will on request receive up to 10 printed copies of the issue of *PIM International* in which their paper has been published. These copies are for the author's own use, including distribution to colleagues and associates.

A final PDF version of the published version of the paper will also be provided. The PDF cannot be used for commercial purposes. This PDF may be posted on authors' individual websites or that of their institution. Authors are entitled to make copies of the paper for reasonable personal use.

#### **FILE REQUIREMENTS**

Please submit a Word file containing the text, references, tables and figure captions plus an individual file of each figure, prepared to the specification following. Please ensure that figures will be legible and comprehensible at final size and are of sufficiently high resolution.

#### **LENGTH, FORMATTING AND STYLE GUIDELINES**

Technical Papers published in *PIM International* are typically 3500 words in length plus figures and tables, however papers ranging from 2000-5000 words are acceptable.

There is no need to format your paper to a specific template, but please include italic or bold type where necessary.

Please use hard returns at the end of paragraphs only; switch autohyphenation off; and do not justify text. Consistency in spacing, punctuation, and spelling is appreciated.

- Tables should be included within the manuscript file, not provided as separate files. Please use Word's "Table" mode, not tabs or spaces between columns. Please do not provide tables as image files.
- Equations should be produced using Word Equation Editor.

The submitted manuscript must contain:

- A title section, giving full contact details for all authors.
- An abstract of around 150 words
- Text: section and subsection headings should be clearly differentiated, using a structured numbering system if necessary (note that this numbering is to guide typesetting and may not appear in the printed version)
- Acknowledgements
- References

#### **FIGURES, TABLES AND CAPTIONS**

Each figure should have a caption that is understandable without reference to the text; discussion of figures should appear in the text of the paper, not the caption.

- Figures should be cited in a single sequence throughout the text as 'Fig. 1', 'Fig. 2'.
- Tables must be numbered in sequence and referred to in the text as, for example, 'Table 1'.

Authors must provide high quality digital files of all figures. All papers will be published in colour, however black & white images will be accepted where necessary.

- Each figure should be supplied in digital form as a separate, clearly named JPEG file.
- Images should be saved at a resolution of at least 300 dpi at final size

#### **REFERENCES**

References and notes should be numbered serially in a single sequence. Citations in the text should be in square brackets [ ]. References should be set out in a complete list at the end of the paper, numbered according to their appearance in the text, not positioned as footnotes.

- All references given must be complete, including all authors where known
- Journal abbreviations in references follow the ISO system
- Book references should give full bibliographic details
- Conference references should include the date, location, and organiser or publisher of the meeting

#### **FURTHER INFORMATION**
